UltraEZ™ DESENSITIZING GEL

- Provides immediate results
- Treats sensitivity
- Non-flavored gel available in syringes or disposable trays

UltraEZ desensitizing gel is a sustained-release 3% potassium nitrate desensitizing gel with fluoride (0.25% neutral NaF). This sustained-release formula quickly eliminates sensitivity from toothbrush abrasion, thermal and chemical changes, tooth whitening, and root exposure.

"Regardless of what whitening system the patient is using (although we use Opalescence), their sensitivity is resolved with UltraEZ. We've tried other products, but UltraEZ is the only truly effective one. Thanks!"
Dr. Scott Irwin – Phoenix, AZ

1008 - UltraEZ Refill

Help Your Patients
STOP
Being So
Sensitive

Ultradent offers a variety of in-office and at-home products specially designed to relieve hypersensitivity.

In-Office Treatments

Enamelast™ FLUORIDE VARNISH

- Patented adhesion-promoting agent for enhanced retention
- Superior fluoride release and uptake
- Smooth, nongritty texture
- Nearly invisible appearance
- Nut free and gluten free

Enamelast fluoride varnish is designed with staying-power. It contains a patented adhesion-promoting agent and has a smooth feel and nearly invisible appearance that your patients won't want to brush off. Plus, Enamelast varnish comes in five great flavors your patients will love—Walterberry, Orange Cream, Bubble Gum, Cool Mint, and Caramel!

"I used to plead with younger patients to let me apply a fluoride varnish. But since we switched to Enamelast, they now come in asking if they can get 'the yummy stuff!' Can't say enough about Enamelast—it's a great product!"
Susan Hanson, RDH – Denver, CO

50 x 0.4 ml unit doses - Bubble Gum
50 x 0.4 ml unit doses - Caramel

Ultradent™ Universal Dentin Sealant FOR TRANSIENT ROOT SENSITIVITY

- Immediate relief—ideal following scaling and root planing
- Economically priced
- Quick application—just paint and dry

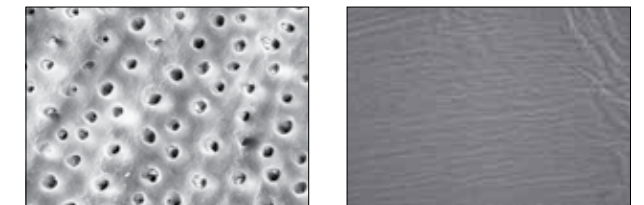

Ultradent Universal Dentin Sealant is a biocompatible, nonpolymerizable, high-molecular-weight resin in a volatile organic solvent. Simply coat sensitive roots or exposed dentin with Ultradent Universal Dentin Sealant to seal tubules and reduce discomfort after root planing or heavy scaling.

"Ultradent Universal Dentin Sealant has been a great find for me. I have it applied on all areas of recession in my mouth at prophy, and it keeps me comfortable for about six months. I always know when I'm due for another prophy because my sensitivity comes back at about that time."
Denise Hanstedt, Dental Assistant – Neenah, WI

266 - Ultradent Universal Dentin Sealant Refill

4 x 1.2 ml syringes

Ultradent Universal Dentin Sealant covers dentin with a protective seal. Both surfaces have been conditioned with phosphoric acid for 20 seconds; SEM on the right was sealed first with Ultradent Universal Dentin Sealant.

1169 - Black Mini™ Brush Tip

100pk
